\$149/mo

SHIPPING (TYPICAL)

\$35

TELEHEALTH CADENCE

Every 90 days

3-MO PREPAY

10% off meds

STARTING AN ORDER (NEW VS RETURNING)

Q. How do I place an order / get started?

A. New patients: go to hellogorgeousmedspa.com/rx/request (or Start Here for peptides), complete intake, pay the \$49 NP consult when prompted, then book telehealth with Ryan Kent, FNP-BC. Returning RX patients: use Care Hub (</rx/care>) or their refill link — they usually skip the \$49 new-patient gate.

Say: "Start online at </rx/request> — or if you're already an RX patient, use Care Hub or your refill link."

Q. Do I have to pay \$49 every time?

A. No. \$49 is the new-protocol / new-patient consult (and the telehealth check-in after a 90-day cycle when required). Stable refills on a paid 90-day or 3-month cycle usually do not need a new visit for that order. Dose changes always need provider review.

Say: "New plans and check-ins are \$49. Steady refills on your cycle usually don't need another visit."

Q. Is the \$49 consult applied to my medication?

A. The \$49 consultation fee is applied to your first month of injectable medication if you decide to move forward with the plan.

Say: "If you move forward with injectable medication, that \$49 is applied to your first month."

Q. Can I order without seeing a provider?

A. No. This is a medical practice. Every prescription requires provider approval after screening. We never dispense without clinical review.

Say: "Everything is NP-directed — Ryan reviews and approves before anything ships."

PRICING & WHAT TO SAY

Q. How much does weight loss / GLP-1 cost?

A. Injectable programs start at \$195/month (lowest published dose tier). Semaglutide from \$195/mo · tirzepatide from \$235/mo. Higher doses cost more. Labs and shipping may be separate.

Say: "Programs start at \$195 a month — your exact dose is set at consult."

Q. How much do peptides cost?

A. Protocols start from \$149/month after NP evaluation. Always say "from \$X per month" — final price depends on the approved protocol.

Say: "From \$149 a month — Ryan confirms the exact plan."

Q. What's the 90-day / 3-month option?

A. 3-month prepay is our most popular: medication for three months, typically one cold-chain shipping fee (about \$35), and 10% off meds vs paying month-to-month.

Say: "Most people choose 90-day — one ship fee (~\$35) and 10% off."

Q. What's included in the price?

A. Medication for the approved dose tier, NP-directed care, and program support as described at checkout. Cold-chain shipping, labs, supplies, and add-on stacks may be quoted separately.

Say: "Meds + medical oversight — shipping and labs can be separate lines."

Q. Do you take insurance for compounded meds?

A. Compounded GLP-1 / peptide programs are typically cash-pay. If insurance covers brand GLP-1 at a retail pharmacy, we offer a separate medical-oversight path — that does not include the pharmacy medication cost.

Say: "Most compounded programs are cash-pay — ask Ryan about insurance-oversight options if you have a pharmacy Rx."

PAYMENT, SHIPPING & TIMELINES

Q. How do I pay?

A. We send a secure payment link by text and/or email. Clients tap the link and pay on their phone. Front desk can confirm the invoice was sent; do not take card numbers verbally into personal notes.

Say: "Watch for a text/email pay link — tap and pay on your phone."

Q. When will I get my medication?

A. After payment clears and Ryan approves the protocol, the pharmacy prepares and ships cold-chain to the address on file. Timing varies by pharmacy queue and shipping; clients track status at /rx/status. Clinical team aims to review new intakes within one business day.

Say: "Once paid and approved, pharmacy ships cold-chain — track at /rx/status."

Q. How much is shipping?

A. Typical cold-chain / pharmacy shipping is about \$35 per ship cycle (one fee on a 90-day prepay cycle). Exact amount is on the invoice.

Say: "Shipping is usually about \$35 — it's on your invoice."

Q. Can I pick up in the spa instead of shipping?

A. Most RX fulfillment is ship-to-home from the compounding pharmacy. In-clinic sales or pickup only when the clinical/ops team has arranged that path — don't promise walk-up pickup unless Ryan/ops confirmed it.

Say: "Most orders ship to your door — I'll check with the clinical team if pickup was arranged."

Q. Where do you ship? / Out of state?

A. Hello Gorgeous RX ships eligible Illinois prescriptions after NP approval. Out-of-state requests need clinical/ops review — do not promise shipment outside Illinois.

Say: "We fulfill Illinois RX after provider approval — I'll confirm if you're outside IL."

TELEHEALTH & VISITS

Q. Do I need a video visit every month?

A. Usually no. Telehealth is typically every 90 days when the dose is stable — not every month. 90-day supply / 3-month auto-pay: no telehealth required for that order cycle; after the cycle, a \$49 check-in is required before the next reorder. Dose or strength changes need a visit sooner.

Say: "Stable plans — about every 90 days, not monthly."

Q. How do I book the consult / telehealth?

A. Book the NP video visit on Fresha (\$49 consult for new protocols). Spa appointments (Botox, facials, etc.) book on Square at /book. Send clients helloworldmedspa.com/telehealth or /book as appropriate.

Say: "RX video visit → Fresha/telehealth link. Spa services → /book on Square."

Q. Can I do this in person instead of video?

A. Yes when Ryan has in-person availability in Oswego — same medical team and screening. Offer to help book; don't invent open slots.

Say: "In-person with Ryan in Oswego works too when the schedule allows."

STATUS, PROBLEMS & HANDOFFS

Q. How do I track my order?

A. Confirmation email has a personal status link (no password). Or [hellogorgeousmedspa.com/rx/status](https://www.hellogorgeousmedspa.com/rx/status) and Care Hub [/rx/care](https://www.hellogorgeousmedspa.com/rx/care). App: [/app?rx=1](https://www.hellogorgeousmedspa.com/app?rx=1).

Say: "Use the link in your confirmation email or [/rx/status](https://www.hellogorgeousmedspa.com/rx/status)."

Q. I paid but nothing shipped / I'm stuck.

A. Check: (1) intake complete, (2) telehealth done if required, (3) invoice paid, (4) Ryan approval pending vs pharmacy. Escalate to clinical/ops with name + phone + order/intake number. Never invent tracking numbers.

Say: "Let me pull your status and loop in the clinical team with your order number."

Q. Can I change my dose / add a peptide?

A. Dose changes and new protocols need provider approval — point them to Care Hub, peptide request, or message [/rx/messages](https://www.hellogorgeousmedspa.com/rx/messages). Don't change dosing advice at the desk.

Say: "Ryan has to approve dose changes — I'll get you into Care Hub or messaging."

Q. I want a refund / to cancel.

A. Do not process RX refunds from the front desk alone. Collect the request, note what was paid, and escalate to owner/ops. Medication that has shipped or been dispensed follows pharmacy and practice policy.

Say: "I'll take your details and escalate to ownership — I can't refund RX from the desk."

COMPLIANCE — NEVER SAY THESE

Q. What pharmacy / brand / wholesale do you use?

A. Licensed US compounding / pharmacy partners under NP prescription. Never name suppliers, wholesale costs, or gray-market sources. Never guarantee outcomes or diagnose at the desk.

Say: "Licensed US pharmacy partners under Ryan's prescription — I don't quote supplier names."

Q. Is this the same as Ozempic / Wegovy / Mounjaro?

A. We discuss compounded vs brand options clinically. Brand names are for identification only. Don't claim bioequivalence or "same as" brand — offer the consult.

Say: "Ryan will explain compounded vs brand options at your consult."

WHEN TO ESCALATE

Escalate to Ryan / clinical ops when: dose advice is needed, out-of-state shipping, refund/cancel, payment disputes, or status is stuck after paid + visit. Desk phone: 630-636-6193.
