Standard Dosing Schedule

TIMELINE	DOSE	VOLUME DRAWN	NOTES
Weeks 1–4	2.5 mg	0.20 mL (20 units)	Starting dose
Weeks 5–8	5 mg	0.40 mL (40 units)	Step 2
Weeks 9+	7.5–10 mg	0.60–0.80 mL	Common maintenance
Maximum	15 mg	1.20 mL — split into 2 injections	Plateau/partial response

Dose typically increases by 2.5mg every 4 weeks as tolerated. Compounded with 10mg/mL pyridoxine (B6) for nausea support. Your provider may hold, step down, or re-titrate your dose.

Common Side Effects

- Nausea, mild stomach upset, or reduced appetite
