

Filler Product Comparison

Juvederm vs Restylane vs Revanesse — complete HA filler reference guide

JUVEDERM COLLECTION — ALLERGAN

Product	G-Prime	Lift Capacity	Best Zone	Duration	Distinguishing Feature
Voluma XC	Very High	Excellent	Cheeks, midface, chin	18–24 mo	Gold standard for midface volume. Vycross technology
Vollure XC	Medium	Moderate	NLF, marionette lines	18 mo	Flexible — moves naturally with facial expression
Volbella XC	Very Low	Minimal	Lips, perioral lines, tear trough	12 mo	Softest Juvederm — minimal swelling post-injection
Ultra XC	Low-Med	Low-Moderate	Lips, moderate NLF	9–12 mo	Classic lip filler. Natural feel. Available in Ultra and Ultra Plus
Ultra Plus XC	Medium	Moderate	Deep NLF, moderate cheek	12 mo	More lifting than Ultra. Versatile workhorse product
Skinvive	N/A (biostimulator)	None	Intradermal skin quality	6 mo	Microdroplet technique. Improves skin hydration and glow

RESTYLANE COLLECTION — GALDERMA

Product	G-Prime	Best Zone	Duration	Distinguishing Feature
Restylane Lyft	High	Cheeks, hands, midface	12–18 mo	FDA-approved for cheeks AND hands. NASHA technology
Restylane Kysse	Low-Med	Lips	9–12 mo	FDA-approved lip filler. XpresHAN technology for natural movement
Restylane Defyne	Medium	Deep NLF, chin, jawline	12 mo	Flexible high G-prime. Moves with expression naturally
Restylane Refyne	Low-Med	Moderate NLF, perioral	12 mo	Softer than Defyne. For moderate lines with natural movement
Restylane-L	Low	Moderate NLF, lips	6–9 mo	Classic workhorse product. Lidocaine included
Restylane Eyelight	Very Low	Tear trough	9–12 mo	FDA-approved for tear trough specifically
Restylane Contour	Medium-High	Cheeks, lateral face	12 mo	XpresHAN tech — balance of lift and flexibility

NON-HA FILLERS — WHEN & WHY				
Product	Type	Duration	Best For	Key Consideration
Sculptra (PLLA)	Poly-L-lactic acid	2–3 years	Volume restoration — gradual, natural	NOT reversible. Results develop over 3 treatments × 6 weeks. Reconstitute 24–48 hrs before use
Radiesse	Calcium hydroxylapatite	12–18 mo	Jawline, hands, deep structural	NOT reversible. Biostimulatory. Avoid lips/tear trough
Revanesse Versa+	HA (Prollenium)	6–12 mo	Lips, NLF, general volume	Competitive HA option. Less swelling reported vs Juvederm Ultra
Belotero Balance	HA (Merz)	6–9 mo	Superficial lines, tear trough	Very soft — excellent for fine lines without Tyndall

KEY REMINDERS

★ HA fillers (Juvederm, Restylane, Revanesse, Belotero) are REVERSIBLE with hyaluronidase. Sculptra and Radiesse are NOT.

★ G-prime = resistance to deformation. High G-prime = more lift and structural support. Low G-prime = softer, more natural movement.

★ All HA fillers cause swelling — assess results at 14 days minimum. Never add more filler before 14-day review.

★ Vycross (Juvederm) vs NASHA (Restylane): different HA crosslinking technologies — affects how the product moves and integrates.

CHOOSING THE RIGHT PRODUCT	
Cheeks (volume)	Voluma XC or Restylane Lyft — high G-prime, supraperiosteal bolus
NLF deep	Vollure, Restylane Defyne — flexible, natural movement
NLF moderate	Restylane Refyne, Juvederm Ultra Plus — medium support
Lips — natural	Restylane Kysse, Juvederm Volbella — low G-prime, minimal swelling
Lips — more volume	Juvederm Ultra XC, Restylane-L — classic workhorse products
Tear trough	Volbella, Belotero, Restylane Eyelight — softest options only
Jawline / chin	Voluma, Radiesse, Restylane Defyne — high G-prime structural support
Gradual rejuvenation	Sculptra — best for global volume loss in patients wanting subtle, progressive results
