MEMBERSHIP TIER FRAMEWORK

Tier	Monthly Price	What to Include	Target Patient	Retention Goal
Entry / Glow Tier	\$49–79/month	Monthly HydraFacial OR facial + 10% off retail products + priority booking	Skincare-focused patients, new patients, non-injectable	12+ months. Converts to higher tiers with results
Core / Beauty Tier	\$149–199/month	Monthly facial + 20 units Botox OR 1 filler syringe per quarter + 15% retail	Regular injectable patient — quarterly maintenance	12–24 months. Most popular tier
Premium / VIP Tier	\$299–399/month	Monthly facial + monthly Botox + 1 filler syringe every 6 months + 20% retail + 1 free IV/month	High-value patients wanting comprehensive care	24+ months. Highest LTV patient
Wellness Add-On	\$99–149/month	Monthly IV drip + quarterly B12 + 15% off wellness services	GLP-1, hormone, or wellness-focused patients	Stack on top of other tiers

MEMBERSHIP REVENUE MATH – WHY IT CHANGES EVERYTHING

Without membership (transactional)	Patient books when they want to. Average 3–4 visits per year. Average transaction \$250. Annual LTV: \$750–1,000
With membership (recurring)	Patient commits monthly. 12 guaranteed visits minimum. Monthly \$199 = \$2,388/year. LTV increases 2–3x immediately
50 members at \$199/month	\$9,950/month guaranteed recurring revenue — regardless of slow seasons, holidays, or cancellations. This is your floor.
100 members at \$199/month	\$19,900/month recurring. Add service revenue on top of memberships = significantly stronger business
Breakeven logic	If your monthly overhead is \$15,000 and you have 75 members at \$199/month (\$14,925) — your membership base nearly covers all overhead. Every service is profit.

MEMBERSHIP VS PACKAGE – KEY DIFFERENCES

MEMBERSHIP (RECURRING MONTHLY)

Auto-charges monthly – predictable revenue

Does not accumulate – use it or lose it (prevents backlog)

12-month commitment or month-to-month with cancellation policy

Keeps patient coming in every month – drives retention

Upsell opportunities every visit

Best for services with monthly use cases (Botox, facials, IV)

PACKAGE (PREPAID BUNDLE)

Patient pays upfront – immediate cash but creates liability

Services accumulate if not used – backlog can hurt cash flow

No recurring obligation – patient may disappear after using package

Lower retention rate than membership

Good for: laser series, peel series, one-time treatment plans

Liability note: prepaid services are refundable in many states

MEMBERSHIP AGREEMENT ESSENTIALS

Commitment term

12-month commitment OR month-to-month with 30-day cancellation notice required. Annual always better for business.

Auto-renewal clause

Automatically renews unless cancelled 30 days before renewal date. State clearly in agreement.

Non-transferable

Membership benefits belong to the member only – cannot be shared or transferred to family members (unless explicitly structured)

Use-it-or-lose-it

Monthly inclusions do not roll over. This prevents backlog and maintains revenue predictability. State clearly.

Pause policy

Allow 1–2 pause periods per year (medical, travel). No more – prevents abuse. Frozen months do not count toward commitment.

Cancellation fee

If patient cancels before 12-month term: remaining months × 50% OR a flat cancellation fee. Disclose clearly at enrollment.

MEMBERSHIP LAUNCH STRATEGY

★ Launch with a founding member rate (10–15% below your future rate) – creates urgency and rewards early adopters

★ Cap founding members at 50–100 people – scarcity creates urgency and allows you to test the economics before scaling

★ Present membership at checkout after a great result – "the best time to ask is when they're looking in the mirror happy"

★ Train every staff member to mention the membership. If only you know about it, only you will sell it.

★ Track monthly: new enrollments, cancellations, net member count, average tier value, monthly recurring revenue. These are your most important business metrics.
