

New Patient Intake Checklist

Complete intake process from first contact through post-appointment — every step and script

FIRST CONTACT — PHONE INQUIRY		BEFORE THE APPOINTMENT — WHAT MUST BE SENT	
Answer within 3 rings	Or return voicemail within 2–4 hours. Every missed call is a potential patient going to a competitor.	Booking confirmation	Send immediately via email/text with date, time, provider name, parking info, and cancellation policy
Opening script	"Thank you for calling [Practice Name], this is [Name], how can I help you today?" Warm, professional, personalized.	Intake forms	Send link within 1 hour of booking. Must include: medical history, medication list, allergy history, photo/HIPAA consent, communication preferences
Qualify the call	What treatment are they interested in? First time patient? How did they hear about you? (Track referral source for marketing)	Pre-appointment reminders	48-hour reminder + 24-hour reminder. Include pre-treatment instructions relevant to their booked service
Handle clinical questions	"Great question — I want to make sure you get the most accurate information. [Provider] would be happy to answer that during your consultation, which is complimentary for new patients."	Pre-treatment instructions	Botox: no blood thinners/alcohol 48 hrs. Filler: no blood thinners, arrive with clean skin. Laser: no active tan. Wax: hair must be ¼ inch minimum
Book the consultation	Always try to book before ending the call. "Do you have a preference for mornings or afternoons? We have availability on [date] and [date]."	Parking/directions	Text address + parking instructions 24 hours before. Reduces late arrivals dramatically
Collect contact info	Name, phone, email, DOB. Confirm spelling. Send booking confirmation and intake form link immediately.		
AT ARRIVAL — CHECK-IN PROTOCOL		DURING CONSULTATION — PROVIDER CHECKLIST	
Greeting	"Hi [Name]! Welcome to [Practice Name]. We're so glad you're here." Use their name. Make eye contact. Make them feel known.	Review intake forms	Review medical history, medications, and allergies before examination. Flag any contraindications or concerns.
Confirm intake forms	Verify intake forms are complete before calling patient back. If not complete — have them finish before going to treatment room.	Pre-treatment photos	Take all required angles before treatment begins. Document in chart immediately.
Confirm consent forms	Treatment-specific consent form must be reviewed and signed before any treatment begins. No exceptions.	Informed consent	Review consent form verbally — confirm patient understands risks, realistic expectations, and post-care requirements.
Photo consent	Confirm photo consent status — are they consented for marketing use, clinical use only, or declined? Document clearly.	Treatment plan	Discuss treatment plan clearly. Set realistic expectations. Never overpromise. Confirm patient understanding before proceeding.
Payment method	Collect payment method on file before treatment. Never treat without confirmed payment. Mention financing options (CareCredit, Cherry) proactively.	Document pre-existing asymmetry	Note and photograph any pre-existing asymmetry. Have patient acknowledge it on consent form. This is your legal protection.

AFTER THE APPOINTMENT — RETENTION PROTOCOL

Post-care instructions	Provide printed or digital post-care instructions specific to the treatment received. Review verbally. Confirm patient understands.
Schedule follow-up	Book the follow-up appointment before they leave. Botox: 14-day follow-up. Filler: 14-day follow-up. Laser: 4–6 week follow-up.
Retail recommendation	Provider recommends 1–2 specific retail products. Front desk reinforces at checkout. Don't recommend more than 2 — overwhelming.
Membership mention	If patient is happy — this is the moment. "Have you heard about our membership program? After seeing your results today, it might be perfect for you."
Review request	In-person ask + text link within 5 minutes of departure. Strike while the emotional high is active.
24-hour follow-up text	"Hi [Name]! Just checking in — how are you feeling after your treatment yesterday? Any questions at all, we're here.  "
