

Staff Role Responsibilities

Front desk, esthetician, and injector assistant — duties, boundaries, and communication protocols

Danielle Alcala · nopriorauthorization.com

FRONT DESK — CORE RESPONSIBILITIES

Booking & scheduling	Manages all appointment booking, cancellations, and rescheduling. Enforces cancellation policy and collects deposits/card on file.
Patient intake	Checks patients in, verifies intake forms and consent forms are signed before treatment begins. Never allows treatment without complete documentation.
Phones & communication	Answers all incoming calls. Returns messages within 2–4 hours business hours. Routes clinical questions to provider — never gives clinical advice.
Payment processing	Processes all payments (cash, card, CareCredit, Cherry). Issues receipts. Manages end-of-day reconciliation.
Retail sales	Presents retail products at checkout. Knows the products well enough to support the provider's recommendations. Tracks retail inventory.
Social media support	Takes before/after photos (with consent), helps with content capture, manages review requests.
Office management	Orders non-clinical supplies. Manages waiting area. Maintains cleanliness and professional appearance of front desk area.

WHAT FRONT DESK MUST NEVER DO

- ❌ Give clinical advice or answer clinical questions — always route to provider ("Great question, let me have [provider] call you back")
- ❌ Quote dosing, unit amounts, or product names for clinical services — always quote prices only
- ❌ Discuss a patient's treatment with anyone other than the patient (HIPAA) — "I'm not able to share any patient information"
- ❌ Upsell or recommend specific clinical treatments — that is the provider's role at consultation
- ❌ Access clinical systems or patient charts without specific authorization and training

LICENSED ESTHETICIAN – CORE RESPONSIBILITIES

Scope of practice	Performs services within licensed esthetic scope: facials, chemical peels (scope-appropriate), microneedling (scope-appropriate per state), waxing, lash, brow, skin consultations.
Patient education	Educates patients on skincare routines, home care, pre/post treatment care. Does NOT give medical advice or discuss injectable treatments clinically.
Room setup and breakdown	Prepares treatment rooms before every appointment. Maintains sterile technique and infection control standards. Breaks down room and restocks after each patient.
Product recommendations	Recommends retail skincare products aligned with provider's clinical recommendations. Builds retail relationships with patients.
Before/after photos	Takes consistent clinical photos pre and post esthetic treatments per photo system protocol. Obtains and documents photo consent.
Charting	Documents treatments, products used, patient response, and follow-up plan in chart within 24 hours of service.

UNIVERSAL COMMUNICATION PROTOCOLS – ALL STAFF

ALWAYS SAY

"Let me get [provider] to answer that for you"

"I'll have someone follow up with you within [timeframe]"

"Thank you so much for choosing us"

"Is there anything else I can help you with today?"

"We'd love to see you back — can I schedule your next visit?"

"I'm not able to share that information, but [provider] would be happy to discuss it with you"

NEVER SAY

"That treatment doesn't really work for..."

"Honestly, I think you should..."

"I know [provider] usually does..."

"We've had patients complain about..."

"Between us..."

"I don't know" (without following up immediately)

"That's not my job"

INJECTOR ASSISTANT – CORE RESPONSIBILITIES

Room prep	Prepares treatment rooms for injectable procedures: sets up sterile field, draws up medications (if licensed and trained), positions patient, labels syringes.
During treatment support	Assists provider during treatment: passes supplies, manages patient comfort, applies topical numbing, monitors patient response.
Supply management	Tracks injectable supply inventory. Orders clinical supplies. Manages medication storage (refrigeration, controlled substances log if applicable).
Post-treatment care	Provides post-treatment instructions to patients. Applies cold compress, takes post-treatment photos, schedules follow-up.
Biohazard management	Disposes of sharps in approved sharps containers. Manages biohazard waste disposal. Maintains OSHA compliance documentation.
Scope limits	Injector assistants who are not independently licensed providers do NOT perform injections, draw conclusions about clinical outcomes, or advise patients on treatment plans.
