

We already have the clinic. We need licensed prescribers outside Illinois.

Prepared for Asher Health · From Danielle Alcalá, owner · Hello Gorgeous Med Spa & RE GEN · Oswego, IL

The ask: a 50-state provider layer under the RE GEN brand – not a gym GLP-1 kit, not a new pharmacy, not a replacement for BoomRx or our Illinois NP.

Hello Gorgeous already runs cash-pay peptides, GLP-1, hormones, labs, Square checkout, and a patient RX portal in production. **Ryan Kent, FNP-BC** is on site six days a week with Illinois prescriptive authority. **BoomRx** is our pharmacy partner; they are ready to integrate via API so we control catalog, pricing, and fulfillment. BoomRx can *ship* nationally. An Illinois FNP cannot *prescribe* nationally. Illinois is not in the APRN compact. That is the only gap this call is about.

HOW WE WANT THIS TO WORK

	ILLINOIS PATIENTS	PATIENTS IN OTHER STATES
Brand the patient sees	RE GEN / Hello Gorgeous	RE GEN / Hello Gorgeous – white label, not Asher-facing
Prescriber of record	Ryan Kent, FNP-BC	Your licensed NP/MD in <i>that</i> state
Fulfillment	BoomRx (API)	BoomRx when legally allowed; your pharmacy only if the state requires it
Pricing & merchant	Our menus · Square	Our menus · our merchant if possible
Patient relationship	Ours	Ours – Asher is a vendor. We keep the chart if we leave.

This is a fit if you can

Put licensed providers in the patient's state, leave Illinois on Ryan, route fills through BoomRx, and stay invisible behind RE GEN.

This is not a fit if you need

Exclusive pharmacy, your portal as the brand, gym-template pricing, or ownership of our patient list.

PLEASE COME READY WITH THESE IN WRITING

- Pharmacy:** Can your providers send the Rx to BoomRx (or a BoomRx-network pharmacy)? If not, that is a deal-breaker.
- States live today:** Actual list for compounded GLP-1s and peptides – not “50-state network” on a slide.
- Hybrid:** Confirm Illinois stays 100% Ryan + BoomRx while other states use your providers.
- White label:** What the patient sees on email, SMS, portal, bottle, and shipping label.
- Offboarding:** We keep the patient, chart, phone, and refill rights if the contract ends.
- 2026 rate card:** Setup, monthly platform, per-consult, per-Rx, labs, chargebacks. Med wholesale shown *separately* from platform fee so we can compare BoomRx unit cost.
- Who bills:** Our Square vs your processor.
- Clinical:** Standing orders vs Ryan's protocols; who the patient calls after hours; malpractice additional insured for our brand and staff.
- API:** Push/pull into BoomRx or our RX dispatch so this is not a third portal.
- Compounding reality:** 503A vs 503B, brand vs compounded, current FDA limits by state for semaglutide / tirzepatide.
- Contract:** Term, exclusivity, non-solicit of *our* patients, refund policy on setup.

We are not a pilates studio adding a weight-loss SKU. We are a medical practice buying licensed coverage outside Illinois. This brief is for partnership discussion only. It is not a contract and not medical or legal advice. Counsel will review any MSA before a setup fee is paid.
