

THURSDAY · HELLO GORGEOUS × DR. MUKESH ARORA

How we move forward – and how **all three of us** get paid

You. Danielle. The spa owner. One clean model for every med spa you already direct. No inventory at their front desk. No peptide menu on their Instagram. Ryan still reviews every chart.

THE PROBLEM WE ARE NOT REPEATING

White-label pharmacy at someone else's spa is the **wrong** first move

WHAT WE WILL NOT DO

- Store, sell, or inject compounded vials at a day spa
- Put a peptide catalog on their website or social
- Ask you to take equity or write a check
- Ask you to review every RE GEN chart – that is Ryan

WHY

That model dumps inventory risk, compounding advertising risk, and “whose patient is this?” onto you and the spa owner. We already have a cleaner door: the patient becomes a **Hello Gorgeous patient**. Your job is medical direction and network introductions – not pharmacy operations.

THE MODEL

A QR door at spas you already **direct**

Front desk keeps a tent card. Patient scans. Books a \$49 NP consult with Hello Gorgeous. Ryan reviews the chart and prescribes when appropriate. Pharmacy ships to the patient's home. Spa never touches a vial.

1 • SPA

Prints the tent card. Uses our script: "medical consultation through Hello Gorgeous." Earns \$100 when that patient pays for medication the first time.

2 • YOU

\$1,500/mo to direct Hello Gorgeous. +\$500/mo once the first spa you introduce is live. \$25 override on each first paid med from those doors. \$250 once if you sit the kickoff.

3 • DANIELLE / HG

Software, consents, pharmacy, shipping, Ryan's time, customer service. Keeps the refill months – that is where the practice profit lives.

LICENSE PROTECTION – THIS WEEK

Public marketing is now consult-first

We pulled named compounded-peptide catalogs off the public site. Spas in your network will use the same rule. That is not window dressing. It is how we keep your name off a peptide menu.

WHAT THE SPA MAY SAY

- “We can connect you with a medical consult through Hello Gorgeous.”
- “Weight-loss and wellness programs – a licensed NP reviews every chart.”
- QR to the Hello Gorgeous consult, not a product list.

WHAT THEY MAY NOT SAY

- No named research peptides on Instagram or the spa site
- No “same as Ozempic / Wegovy / Mounjaro”
- No guaranteed results, before/after dosing, or DIY kits

Compounded GLP-1 is not FDA-approved and is not the same as brand-name products. Prescribing happens only after a licensed clinician decides it is appropriate. This deck is not legal advice.

WHO DOES WHAT – LOCKED

Three lanes. No overlap.

PERSON	DOES	DOES NOT
Dr. Arora	Medical director, \$1,500/mo. Network intros. Optional kickoff.	Review every RE GEN chart. Own inventory. Market peptides.
Ryan Kent, FNP-BC	Reviews every RE GEN chart. Prescribes when appropriate.	Run the spa. Own the software.
Danielle	Owner, ops, software, pharmacy, payouts, marketing guardrails.	Prescribe. Touch a chart clinically.
Spa owner	Tent card + script. Send the patient.	Store, sell, or inject compounded medication.

MONEY – LOCKED NUMBERS

What each of us makes

YOU

\$1,500

per month • HG medical director

+\$500/mo network retainer once spa #1 is live
+\$25 per first paid med from those doors
+\$250 once per kickoff you sit

SPA OWNER

\$100

per first paid medication order

Zero inventory. Zero pharmacy license. Cash when the patient actually starts therapy – not when they scan the QR.

HELLO GORGEOUS

Refills

month 2+ after COGS & ops

We fund the \$100 + \$25 on month one. We earn on consult (\$49) and on patients who stay. That is the practice we are building.

ONE PATIENT – WHO GETS WHAT

First paid month vs month two

Illustrative. Uses a GLP-1 program fee in the \$195-\$235 range. Actual therapy and fee are quoted after consult. Pharmacy cost is real and comes out of HG's side – not yours, not the spa's.

	MONTH 1 (FIRST PAID MED)	MONTH 2+
Spa owner	\$100 (once)	\$0 – they already got paid for the intro
You (override)	\$25 (once, if from a door you introduced)	\$0 override – retainer still runs
Hello Gorgeous	Program fee – pharmacy – \$125 referral – Ryan/ops	Program fee – pharmacy – ops. This is the profit engine.
Patient	\$49 consult + first month of prescribed therapy + shipping	Refill if clinically appropriate. Ships home.

Not a guaranteed margin. If a patient never converts past consult, spa gets \$0 and you get \$0 override – which is the point. We only pay on a real start.

WHAT THIS LOOKS LIKE IF IT WORKS

Five doors. Conservative.

Not a forecast. A whiteboard: 5 spas you already direct, 8 first-time paying patients each in a given month.

POCKET	MATH	THAT MONTH
Five spa owners (together)	$40 \times \$100$	\$4,000
You – retainers	$\$1,500 + \500	\$2,000
You – overrides	$40 \times \$25$	\$1,000
You – total cash that month		\$3,000 (+ \$250 if you sat a new kickoff)
Hello Gorgeous	40 consults + 40 first months – \$5,000 paid out – pharmacy – Ryan	Thin on month 1. Healthy if they refill.

You still did not review those 40 charts. Ryan did. You directed the practice and opened the doors.

WHY THE SPA OWNER SAYS YES

They keep aesthetics. We take the **medical risk.**

THEY ALREADY HAVE THE PATIENT

Someone in the chair asking about weight loss or “peptides they saw online.” Today that is either a dead-end or a compliance problem. Tomorrow it is a \$100 intro with a script you can defend.

THEY DO NOT BECOME A PHARMACY

No fridge of vials. No compounding ads on their Google listing. No “whose DEA is on this?” The patient is ours. Their brand stays a spa. Their medical director stays you – for the work you already do there.

WHY THIS IS GOOD FOR YOU

Same network. New line. Bounded risk.

FLOOR

\$1,500/mo to be medical director at Hello Gorgeous whether a single QR converts or not. That is practice oversight, not per-chart piecework.

UPSIDE

Network retainer + \$25 × every real start from doors you open. You get paid for relationships you already have – without adding chart volume to your nights.

COVER

Ryan on every RE GEN chart. Consult-first public copy. No spa inventory. Your name is on direction of Hello Gorgeous – not on a peptide storefront at a day spa.

PROOF BEFORE SCALE

Spa #1 first. If the door is clean, we copy the tent card. We do not promise five go-lives today. We ask for one introduction.

WHY THIS IS GOOD FOR DANIELLE

We buy the first month. We own the relationship.

Paying \$125 to acquire a patient who then refills with us is a customer-acquisition cost, not a giveaway. The spa cannot take that patient to a different pharmacy next month – they never had the chart. We did.

WHAT WE FUND

Software, Square booking, consents, Ryan's review time, compounding pharmacy, shipping, the \$100 + \$25 on convert, and the marketing guardrails so this does not blow back on any of us.

WHAT WE KEEP

The patient. The refill. The data. The ability to run this the same way at the next door you introduce. That is the only way this is a business instead of a one-time referral fee.

GO-LIVE – SPA #1

What “live” actually means

WEEK OF INTRO

You make the introduction. Danielle sends a one-page spa agreement + tent-card PDF + the allowed script. Optional: you sit a 20-minute kickoff (\$250).

DESK

QR on the card. Front desk trained on two sentences. No vials. No product photos. Owner signs: they will not store or advertise named compounded peptides.

FIRST CONVERT

Patient pays consult, Ryan charts, medication ships. Spa invoice for \$100. Your \$25 override accrues. Network retainer starts the month that spa is live.

WHAT WE ARE NOT ASKING TODAY

This is not the old deck.

NOT TODAY

- Five white-label go-lives
- You investing or taking equity
- OpenEMR / full EHR build as a condition
- Peptides mixed and stored under their roof
- \$3,000-\$8,000/mo MD retainers

LATER – ONLY IF #1 IS CLEAN

- Copy the tent card to the next spa you direct
- A different contract if a spa ever wants in-house medical (their NP, your protocols, our software) – that is not this program

THE ASK – TODAY

Two yeses.

1. Medical director of Hello Gorgeous at **\$1,500 per month**.
2. Introduction to **spa #1** – one med spa you already direct that will run the QR door.

If both are yes, Danielle sends the MD agreement and the spa one-pager this week. Counsel, carrier, and collaborative-practice language still have to close. This slide is the business deal, not the contract.

Hello Gorgeous Med Spa · Oswego, IL · Discussion materials only – not a binding offer. Fees are proposed commercial terms. Clinical care is individualized. Compounded medications are not FDA-approved. Final terms subject to written agreements, Illinois licensing, and malpractice coverage.
