

How we are profitable together – and the exact protocol we run.

Prepared for Dr. Mukesh Arora, MD · Hello Gorgeous Med Spa / RE GEN · Companion to the partnership summary

Profit is not five spas injecting peptides. Profit is one clinic, one NP, many front doors – paid when medication is paid, then kept on a refill cadence Ryan already runs.

WHERE THE MONEY COMES FROM

The patient pays **Hello Gorgeous**. We pay pharmacy cost, Ryan (already on payroll), you, and the referring spa. The spa is paid **once**. You are paid a retainer plus a small acquisition override. Month two and after is where the practice gets healthy – that is by design.

LINE	MONTH 1 (NEW REFERRED PATIENT)	MONTH 2+ (SAME PATIENT, REFILL)
Patient pays HG	\$49 consult + medication (e.g. semaglutide from \$195) + shipping ~\$30	Medication only (from \$195 / \$235 / \$149 / \$169). No new \$100. No new \$25.
Referring spa	\$100	\$0 in v1
You (override)	\$25	\$0 extra
You (retainers)	\$1,500 Medical Director every month, whether this patient exists or not. +\$500 network once the first of your spas is a live door.	
Pharmacy / shipping	Our wholesale. We do not publish COGS to referring spas. Pickup in Oswego or ship Illinois.	
Ryan	Every chart. Already paid as our NP. Not renegotiated in this deal.	

Illustrative month – five of your spas live, 8 first-time paying patients each (40 people), mix of starter GLP-1 / peptide.

Spas receive \$4,000. You receive $\$1,500 + \$500 + (40 \times \$25) = \mathbf{\$3,000}$. If 25 of those 40 refill the next month, Hello Gorgeous bills ~25 x from-\$195 with *no* spa cut and *no* extra \$25 – that is the engine. If a spa sends 20 first-time paying patients in a month, that spa earns \$2,000 for a QR and a conversation. We keep the refills. These are illustrations, not forecasts or guarantees.

WHY THIS IS PROFITABLE FOR BOTH OF US

You

Fixed \$1,500 for a practice that already has an NP. \$500 because your name opens five doors. \$25 only when a door actually converts. \$250 when you show up for kickoff. You do not buy inventory or read 40 charts.

Your spas

\$100 cash when the first vial is paid. No fridge, no pharmacy license, no residual accounting. They keep facials and lashes. Peptides stop being “we should offer that” and become a card at the desk.

Hello Gorgeous

We already built intake, consult, Ryan’s queue, pharmacy, portal, refill SMS. Your network fills that queue. We eat month-1 referral cost to own month-2+ revenue and the medical relationship.

EXACT BUSINESS PROTOCOL

1. **Intro.** You introduce Danielle to the owner/manager of spa #1. You are the reason they take the meeting.
2. **One-page referral agreement.** Danielle papers it. They may hand our QR. They may not store, sell, or inject medication. Illinois patients only.
3. **Kickoff (you, 30 minutes, \$250).** You sit with their front desk: script, QR tent card, "you are sending them to Hello Gorgeous – we are the clinic."
4. **Door live.** Danielle marks that spa live. Your **\$500 / month network retainer** starts with the first live door.
5. **Scan.** Client scans. Cookie attributes them to that spa for 90 days. They are now a Hello Gorgeous / RE GEN patient.
6. **\$49 NP consult.** Intake is free to submit. Consult fee holds the visit. Medication is not billed yet.
7. **Ryan reviews within one business day.** Yes / no / change. Ugly charts (cardiac history, odd labs, a deny he is unsure about) escalate to you the same day.
8. **First medication paid.** Patient pays Hello Gorgeous (Square). Pharmacy fills. Pickup in Oswego or ship. System queues **\$100 to the spa** and **\$25 to you**. One time per patient, lifetime.
9. **Danielle pays the ledger.** Monthly: spa cuts, your overrides, retainers on the 1st, kickoffs when you sat in. W-9. Not equity.
0. **Repeat doors 2-5** the same way. No five-spa dump in week one. Spa #1 clean, then the next intro.

HOW WE FOLLOW UP – THREE CLOCKS, NOT ONE

CLOCK	WHO	CADENCE	WHAT HAPPENS
Patient – clinical	Ryan	Every chart now. Telehealth about every 90 days when dose is stable (sooner if dose changes). Refill reminder 7 days before supply runs out; overdue alert to staff if they lapse.	Portal refill → invoice by text/email → Ryan approves → ship or pickup. Patient never goes back to the referring spa for the vial.
Patient – if they stall	Danielle / desk	Consult paid, no med: same-week nudge. Med paid, no refill: cadence SMS. Abandoned cart: recovery email/SMS.	No spa residual for ghosts. We only pay \$100 / \$25 on a paid first medication order.
You – clinical QA	You + Ryan	Anytime: Ryan escalates. Monthly: we email you a sample of 5 RE GEN charts if you want them. Quarterly: 30-minute huddle on patients from your spas (adverse events, denials, script issues).	This is oversight, not a second full-time NP job.
Spas – relationship	Danielle; you on intros	Week 1 after kickoff: Danielle checks the desk is still handing the card. Monthly: payout report to that spa ("8 first-time patients = \$800"). If they fridge a vial or advertise as the clinic, we pull the QR the same day.	You are copied on any pull. Your name is why they said yes – we protect it.
Money – us two	Danielle	1st of month: \$1,500 (+ \$500 if a door is live). Overrides and spa \$100s batched from the ledger. Kickoff \$250 when the session happened.	You should never have to chase a check. If a line is wrong, you text Danielle – not Ryan.

90-DAY SCOREBOARD (SO WE KNOW IT IS WORKING)

We count

Doors live. Scans. Consults paid. First meds paid. Refill rate at day 35 and day 70. Escalations to you. Charts you sampled. Payouts marked paid.

We do not count

Weight lost. "Results." How many vials a spa stored. White-label software sold. Equity conversations. Those are later – after 90 clean days at Hello Gorgeous and one referring door.

Hello Gorgeous Med Spa · 74 W. Washington Street, Oswego, IL 60543
630-636-6193 · hellogorgeousmedspa.com/rx · Companion to the partnership summary

Danielle Alcala Glazier, Owner · Ryan Kent, FNP-BC, Prescriber
Dr. Mukesh Arora, MD – proposed Medical Director

Illustrative economics only – not a forecast, quote, or outcome guarantee. Not a binding contract until counsel papers it. Illinois patients. Medication invoiced only after NP approval. Dose and labs can change published "from" prices. v1 referral fee is one \$100 per patient on first paid medication order; no residual to the referring spa.
