

RE GEN is our peptide line. We white-label it with a licensed compounding pharmacy.

Prepared for Dr. Mukesh Arora, MD · Hello Gorgeous Med Spa, Oswego, IL · Companion to today's partnership summary

This is not white-label software for other spas. This is Hello Gorgeous putting our brand on our medication – a pharmacy partnership so patients receive a RE GEN product, not a generic bag.

We already run cash-pay peptides and GLP-1 in production: intake, **Ryan Kent, FNP-BC** on every chart, licensed US compounding fulfillment, ship-to-home or pickup in Oswego. The gap is identity. Today the vial can look like whoever compounded it. Tomorrow the patient should hold **RE GEN by Hello Gorgeous Med Spa** – your medical directorship on a real product line, not a reseller label.

WHAT "WHITE-LABEL PHARMACY" MEANS HERE

HOW IT WORKS

Who compounds	A licensed US 503A and/or 503B compounding pharmacy. They make the sterile medication. We do not become a pharmacy.
Who prescribes	Ryan writes a patient-specific order after consult. You oversee the practice. Danielle does not prescribe.
What the patient sees	RE GEN branding on the kit / outer pack / patient-facing materials. Professional, ours, consistent across every referred spa.
What the law still requires	The pharmacy remains on the Rx label as required (compounder, BUD, Rx info). We are not hiding the source. We are owning the brand.
Who the patient belongs to	Hello Gorgeous / RE GEN. Our consents. Our NP. Our pharmacy account. Referring spas never stock, sell, or inject the vials.

WHY THIS MATTERS WITH YOU AS MEDICAL DIRECTOR

What it gives the practice

- One formulary you can review and stand behind
- One primary compounding partner – quality packet, not a rotating catalog of random stock
- Patients (and referring spas) see a branded medical line, not a gray-market vial story
- The moat stays with us: brand, patient, refill cadence – not the spa, not the pharmacy's consumer name

What it is not

- Not FDA-approved "RE GEN drugs." Most peptides remain compounded, off-label, NP-directed
- Not your name sold as a celebrity endorsement on a box
- Not other spas' logos on our vials
- Not a software license, EHR project, or five white-label go-lives
- Not day spas refrigerating medication

STARTER RE GEN LINE (LIVE PUBLISHED MENU – “FROM” PRICING)

Ryan matches dose at consult. This is the product family we want under one branded pharmacy contract – not a promise of every SKU on day one.

LANE	FLAGSHIP	PATIENT PAYS
Medical weight loss	Compounded semaglutide · tirzepatide	From \$195 / \$235 per month
Recovery	BPC-157 · TB-500	From \$169 per month
GH-axis support	Sermorelin · CJC / ipamorelin	From \$149 per month
Cellular / wellness	NAD+ injectable protocol	From \$169 per month
Entry	NP consult with Ryan	\$49 – credited toward first injectable month if they start
Fulfillment	Clinic pickup in Oswego or cold-chain home ship	\$30 shipping when it ships

Additional peptides (skin, intimacy, blends) stay behind consult. No outcome guarantees. “From” is what is published today; labs and dose can change the number.

WHAT WE REQUIRE FROM THE PHARMACY PARTNER

Must have • Licensed US sterile compounding (503A patient-specific and/or 503B outsourcing facility) • Certificates of analysis: potency, sterility, endotoxin as applicable • Cold-chain to Illinois; pickup path for Oswego • Private-label / branded kit capability for RE GEN • Beyond-use dating we can defend clinically • A contract Hello Gorgeous holds – not a spa, not a side account	We will not • Source research-use-only or gray-market peptides • Let a referring spa open their own pharmacy login “for convenience” • Put another clinic’s name on our line in v1 • Quote wholesale cost in the room or on a spa leave-behind
--	--

How a referred patient still works. Spa scans our QR → they become our patient → \$49 consult → Ryan writes the order → pharmacy fills the *RE GEN* kit → ship or Oswego pickup. Spa earns \$100 on first paid medication. You earn the Medical Director retainer (and the network override if that spa is one you directed us to). Same rails as Document 1. Branding is the upgrade inside the box.

TODAY’S ASK ON THIS PAGE

We are asking • As Medical Director, review and approve the starter RE GEN formulary • Approve that we pursue one primary branded compounding partner – you see the quality packet before we lock it • If you already trust a 503A/503B, introduce us. We will diligence it. You are not selling us a pharmacy • Same MD agreement as Document 1: \$1,500 / month practice oversight – this line sits under that practice	We are not asking • Equity, investment, or a pharmacy joint venture • You to compound, dispense, or read every chart • Your other spas to stock or inject RE GEN vials • White-label software under their names
---	---

Not a binding contract. Pharmacy private-label terms to be papered with counsel and the compounder’s agreement. Compounded medications are prepared for individual patients and are not FDA-approved brand products. Illinois patients. No diagnosis, dosing, or outcome claims are made in this summary.
