

Your clients want peptides. You should not become a pharmacy to say yes.

Hello Gorgeous RE GEN • Oswego, IL • Ryan Kent, FNP-BC reviews every chart • Medical Director Dr. Mukesh Arora, MD

You keep the facial. We take the medical. You earn \$100 when that person pays for their first month of medication – not for a scan, not for a no-show.

\$100

to your spa, once, per new paying patient

20 first-time paying clients in a month = **\$2,000** for a tent card and a sentence at the desk. No fridge. No inventory. No residual paperwork in v1.

What you are not doing

- Storing, selling, or injecting vials
- Using your own consents for this program
- Becoming the prescribing clinic
- Buying a compounding account or an EHR

WHY SPAS SAY YES WITHOUT STANDING UP A MEDICAL PROGRAM

Clients already ask at the desk. The expensive path is hiring an NP, getting a medical director on the peptide program, opening a pharmacy account, writing consents, and owning every refill. The simple path: **you are the introduction. Hello Gorgeous is the clinic.** Ryan Kent, FNP-BC (full Illinois prescriptive authority, on site six days in Oswego) reviews every chart. Medication ships to their house or they pick up on Washington Street.

HOW A REFERRED CLIENT WORKS

#	AT YOUR SPA	AT HELLO GORGEOUS
1	Desk hands our QR / tent card. One sentence (script on page 2).	They become our patient. Our intake. Our consents.
2	You keep doing the service they booked with you.	\$49 NP consult. Nothing ships until Ryan approves.
3	You wait. No vial in your fridge.	If they pay for month-1 medication, we owe you \$100 that month on the referral report.
4	They come back to you for facials, lashes, memberships.	Refills, labs, questions, and shipping stay with us. You are not on the hook for the chart.

Day spas: this is a **referral agreement**, not a medical partnership. Med spas: even if you already have a director for injectables in your rooms, peptides in v1 still run through Hello Gorgeous so one NP, one pharmacy, one consent stack. If you later want peptides under your roof with your own NP, that is a different contract.

WHAT YOUR FRONT DESK SAYS (WORD FOR WORD)

THE LINE

"We partner with Hello Gorgeous Med Spa in Oswego for physician-supervised peptides and weight loss. Scan this – you'll be their patient. They do the consult and the medication. We don't keep vials here. You can still get your facial with us."

If they ask price: "Consult is \$49. Medication starts from \$149-\$235 a month depending on what their NP approves. We don't quote a dose – that's medical." If they ask "can you just order it for me?": "No. That's why we send you to them."

WHAT PATIENTS PAY THEM (LIVE PUBLISHED MENU – SO YOU ARE NOT GUESSING)

ITEM	THEY PAY HELLO GORGEOUS
NP consult	\$49 – credited toward first month of injectable if they start
Semaglutide	From \$195 / month
Tirzepatide	From \$235 / month
Sermorelin	From \$149 / month
BPC-157 injectable	From \$169 / month
Shipping when it ships home	\$30 typical RE GEN checkout

Dose and labs can change the number. No outcome promises. "From" is on the site today.

RULES THAT PROTECT YOU AND US

You may

- Keep our tent card at the desk and in the take-home bag
- Say you partner with Hello Gorgeous for supervised peptides / weight loss
- Earn \$100 when that referred client's first medication order is paid
- Keep every non-medical service you already sell

You may not

- Store, sell, compound, or inject peptide / GLP-1 medication
- Advertise as if you are the prescribing clinic
- Collect their medical history "for us" on paper in your spa
- Call a no-show consult a payable referral

HOW WE START – 20 MINUTES, THEN YOU ARE LIVE

STEP	WHAT HAPPENS
1	One-page referral agreement. W-9. We issue your unique QR (your spa's code – so we know who to pay).
2	Danielle trains your desk: script, card placement, what to do if they ask for a vial.
3	Go live. We send a monthly report: scans vs first paid meds vs \$100s owed. Paid with the report.
4	If the rules break, we pull the QR the same day. Your name stays off a medical mess.

Hello Gorgeous Med Spa • RE GEN

74 W. Washington Street, Oswego, IL 60543
630-636-6193 · hologorgeousmedspa.com/rx

Danielle Alcala Glazier, Owner
Ryan Kent, FNP-BC, Prescribing NP
Dr. Mukesh Arora, MD, Medical Director

Referral program, not a license to practice medicine. Illinois patients. Not a binding contract until the one-page agreement is signed. \$100 is owed only on that client's first paid medication order with Hello Gorgeous. No residual in v1. No diagnosis, dosing, or outcome claims. If a med spa later wants peptides under their own NP, that is a separate conversation.
